

# PROJECT CASE

Ultimate Aesthetics

## Serene Horizon Villa

This project focuses on creating a luxurious modern minimalist villa interior, emphasizing an open spatial feel and abundant natural light. The spacious open-plan living room features floor-to-ceiling glass windows that seamlessly connect the interior with the courtyard.

Warm-toned wide-plank SPC wood flooring in OKA color combines aesthetics with durability to create a warm and comfortable living atmosphere.

Clean white walls serve as the base, complemented by a large white modern sofa and low-profile neutral furniture, maintaining a minimalist and airy ambiance.

Minimal decorative elements ensure a clean, uncluttered visual effect, highlighting the “less is more” design philosophy.

### Natural Landscape :

Through the large glass Windows inside, one can see a simple and clean courtyard with a tidy lawn, a modern swimming pool, flower beds and shrubs
